

PHANTOM SCREENS™

January 2017

London Life Magazines

The Ultimate Bespoke Solution for Bifold and Sliding Doors

Phantom Screens provide unobtrusive privacy, solar and insect screening for openings up to 12m wide. Our screens are designed to fully recess from view when retracted and they can be finished in any RAL colour to blend seamlessly with your existing design scheme.

Phantom Screens can also be integrated with home automation systems, as well as sun and wind detectors to automatically adjust screen position in response to external conditions.
