## Phantom Screens: Our Best Features

Here at Phantom Screens we're very proud of the premium quality of our door and window screens, all of which are manufactured using materials of the highest quality and finished with the utmost attention to detail to ensure that you're getting a product that works beautifully and lasts.

Phantom Screens are the UK's leading manufacturer of retractable screens for insect protection, solar shading, privacy screening, and blackout purposes. Below, we've highlighted a few of the key features which set Phantom Screens apart:

### Latching Handle

The Legacy door screen features an integrated latch and release handle suitable for a wide variety of doors. Our handle design is sleek and ergonomic, so it feels great and provides smooth, silent operation.

### Soft-Close System

Our retractable screens can be fitted with a soft-close system as an option, which allows the mesh to slide smoothly back into its housing where it is protected from accidental damage and wear. This smooth glide gives a true feeling of quality engineering.

### Mesh and Fabrics

Phantom Screens can be fitted with any mesh or fabric to suit a range of applications including insect protection, solar shading, privacy screening, or even complete blackout for home cinemas.

### Colours and Woodgrains

Phantom Screens can be finished in any colour of your choice to match your door or window frames. Simply specify a RAL colour and we'll match it. We also offer three realistic woodgrain finishes for more traditional interiors.

These unique features combine to make Phantom Screens the ideal solution for screening windows and doors – including bifolds and other large openings.
