[Phantom Screens - Refer and Earn in 2017](#)

Traditionally associated with American markets, door and window screens are gaining traction in the UK due to the continued popularity of larger openings and bifold doors. Here at Phantom Screens, we're investing in our marketing with a comprehensive plan for this year and have seen enquiries boom in the first quarter of 2017.

You can benefit.

[Refer and Earn Promotion](#)

This summer, we're offering 15% of any screen project's net value on completion. There's no need to turn away any door or window screen sales – instead, simply pass the customer lead to us to survey, sell and install. No investment in sales samples or installation training is required to benefit from every lead we convert.

[What Are Phantom Screens?](#)

Phantom Screens help extend the enjoyment of summer evenings and provide welcome, insect-free ventilation. Thermal comfort gains are made by retaining heat in the evenings while deflecting energy during the day. By controlling solar gain and allowing constant ventilation, Phantom Screens contribute to the reduction of internal temperatures, which creates savings on HVAC costs.

A comprehensive range of technical fabrics is available to suit specific requirements - including standard and fine weave insect meshes, solar shading, blackout, and privacy screens. Alongside standard white and brown frames, our screens can be finished in any RAL colour to match existing decor. We also offer a range of wood grain finishes.

[Quality & Care](#)

As the sole UK distributor of Phantom Screens, we manufacture to the highest quality standards with the same level of attention and consideration that our US markets have come to expect. A Limited Lifetime Warranty is offered on all screens, backed up by exceptional care and customer service.
