

PHANTOM SCREENS™

June 2017

Privacy, Solar and Insect Screening from Phantom Screens

Phantom Screens offers fully automated retractable systems, capable of screening the largest openings. Our Executive Screen can be designed to fully recess from view when retracted and features low-profile retrofix options. It can also be finished in any RAL colour to ensure minimal impact on architectural design.

A comprehensive range of meshes is available to suit specific requirements - including standard and fine weave insect meshes, solar shading that blocks up to 95% of harmful UV rays, as well as privacy screens.

As the sole UK distributor for the world-leading Phantom Screens brand, we manufacture to the high quality standards that US customers have come to expect. To find out more about our products or to request a copy of our brochure, please contact Phantom Screens.
